Elgin, SC 29045

NOTICE

Lee County customers may notice a temporary change in taste, odor, and color of their water.

Lee County Utilities will be temporarily converting its disinfectant process from chloramines to free chlorine residual from July 1 through July 21, 2022.

This is a routine measure that is common for water utilities using chloramines as its primary disinfectant.

Anyone who uses a kidney dialysis machine at home should contact his or her equipment supplier so the proper filtering equipment may be installed.

Tropical fish or aquatic animal owners should contact a local tropical fish store for appropriate pretreatment of water before adding water to tanks.

Customers may notice a temporary change in the taste, odor, and color of the water, which is not harmful.

Again, this is a routine measure to ensure our customers of clean, safe potable water.
